[Food chain of the Tundra Ecosystem - eschooltoday](#)
The example below shows the energy flow in a basic food chain in The Tundra. This food chain is part of a more complex food web involving producers and consumers. [What Is the Food Chain in the Tundra? | Reference.com](#)

The food chain in the tundra consists of carnivores, herbivores and insects. Carnivores, because they are meat eaters, are at the top of the tundra food chain. Insects are at the bottom of the food chain, and herbivores fall in the middle of the chain.

[A Simple Explanation of the Food Chain in the Tundra Region](#)

The fragile food chains of tundra support some of the most amazing species on the planet, including the likes of gray wolves, polar bears, snowy owls, and Arctic foxes. For tundra plants and animals, survival is not just about battling the harsh environment of this biome, but is equally about being a part of its complex food web.

[About Food Chains in the Tundra Ecosystem | Sciencing](#)

[Sciencing](#)

The tundra biome is characterized by a cold, dry climate. The plants and animals in tundra ecosystems form communities based on the transfer of energy between organisms. A food chain shows how energy is transferred from one living thing to another. Food chains intersect to form food webs.

[The Food Chain - The Tundra - Weebly](#)

The polar bear is the predator top in the food chain. They can smell their food from 20 miles away. They are also the biggest in the tundra so they can take in a large amount of food at a time.

[What Is the Food Chain in the Tundra Biome? | Reference.com](#)

[Reference.com](#)

The arctic tundra biome supports a food chain that begins with plants as primary producers at the bottom. Herbivores consume the plants; and, primary small omnivores hunt the herbivores. Secondary or larger predator carnivores hunt both the herbivores and smaller omnivores.

[What food is in the Tundra - answers.com](#)

Tundra is a large flat area found in the arctic regions of Europe, Asia and North America that is void of shrubs, trees, or any other form of vegetation and having the grounds below its surface.
