[Computer-aided design - Wikipedia](#)

Computer-aided design (CAD) is the use of computers (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. [2]

[Computer-aided selling CRM glossary](#)

Computer-aided selling The term sales support involves using computer-based tools and methods to optimize sales processes and in doing so increase sales. Sales support is a central component of Customer Relationship Management (CRM) and should be used in all areas of sales.

[Computer-Aided Engineering \(CAE\) - Siemens PLM Software](#)

Computer-aided engineering (CAE) is the use of computer software to simulate performance in order to improve product designs or assist in the resolution of engineering problems for a wide range of industries. This includes simulation, validation and optimization of products, processes, and manufacturing tools.

[Computer Aided Manufacturing - autodesk.com](#)

Computer Aided Manufacturing (CAM) is the use of software and computer-controlled machinery to automate a manufacturing process. Based on that definition, you need three components for a CAM system to function: Software that tells a machine how to make a product by generating toolpaths.

[CAD Software | 2D And 3D Computer-Aided Design | Autodesk](#)

CAD, or computer-aided design and drafting (CADD), is

technology for design and technical documentation, which replaces manual drafting with an automated process. If you're a designer, drafter, architect, or engineer, you've probably used 2D or 3D CAD programs such as AutoCAD or AutoCAD LT software.

Computer-aided - Wikipedia

Computer-aided or computer-assisted is an adjectival phrase that hints of the use of a computer as an indispensable tool in a certain field, usually derived from more traditional fields of science and engineering.
