[Dragonfly Biology](#) : Head: Like all insects, the dragonfly is made up of three main body parts: head, thorax and abdomen. The head is a tough, rounded capsule, hollowed out at the back to allow efficient attachment of the neck and to increase head mobility. The mouth is a complex hodgepodge of structures that you would not want to encounter in a dark alley. The upper lip, or labrum, is often

This is about the biology of the beautiful dragonfly. If you want to know more about the lifecycle of the dragonfly, what it eats or what the dragonfly symbolizes, check out the pages dedicated to each.

**Biology & Ecology | [british-dragonflies.org.uk](http://british-dragonflies.org.uk)**

**Biology & Ecology. The Life Cycle of a Dragonfly** There are three stages in the life-cycle of all dragonflies. The egg hatches into the larva (also known as a nymph), which moults up to 15 times before emerging as an adult. Unlike most other insects, there is no pupal stage and the transition from larva to adult is known as incomplete metamorphosis. This is not necessarily an annual cycle
