[Education for tomorrow - UNESCO](#)

education would be failing in its task if it did not produce citizens rooted in their own cultures and yet open to other cultures and committed to the progress of society. The second crucial issue is the ability of education systems to adapt to new trends in society. This brings us to one of the fundamental responsibilities of education having to prepare for change despite the growing

Acting Today, Shaping Tomorrow - Ministry of Education ...

education is a shared responsibility and that all of us have roles to play as learners, teachers, leaders, and community members. For example: A Grade 1 student can take a message home and teach his or her family about recycling. Students can get involved in water conservation in the community and then provide leadership at the school. As part of their effort to integrate
