[Primary Prevention | Encyclopedia.com](#)

PRIMARY PREVENTION. Primary prevention generally involves the prevention of diseases and conditions before their biological onset. This can be done in a variety of ways, such as preventing environmental exposures, improving human resistance to disease, or education to diminish risk-taking behaviors.

[Tertiary Prevention | Encyclopedia.com](#)

Tertiary prevention generally consists of the prevention of disease progression and attendant suffering after it is clinically obvious and a diagnosis established. This activity also includes the rehabilitation of disabling conditions. Examples include eliminating offending allergens from asthmatic
