If your podiatrist feels that surgery is the best option for pain relief and long-term results they will discuss surgical procedures as an option for treatment. The majority of foot surgeries are done in an operating room, most

[At Home After Surgery BC Foot and Ankle](#)

The pain from surgery should slowly get better over the first 6 weeks after your surgery. Take your pain medicine regularly. Plan to take your pain medication an hour or so before you do activities or exercises that might cause you pain.

[Foot Fracture Surgery - AOFAS](#)

Potential complications of foot fracture surgery include wound breakdown, failure of the fracture to heal (nonunion), fracture healing in a bad position (malunion), loss of fracture alignment prior to healing, implant failure, persistent pain, loss of motion and arthritis.

[Having Foot or Ankle Surgery - uhn.ca](#)

Why do I need foot or ankle surgery? You may need surgery because of arthritis. Arthritis is a disease that affects the cartilage surface of the joint. In a healthy joint, cartilage covers bone and acts as a cushion to provide smooth and painless movement. The cartilage can wear away from inflammatory arthritis, injury or gradual wear and tear. The surface of the joint eroding and becoming
