### Frostbite - Wikipedia

Frostbite occurs when exposure to low temperatures causes freezing of the skin or other tissues. The initial symptom is typically numbness. This may be followed by clumsiness with a white or bluish color to the skin. Swelling or blistering may occur following treatment. The hands, feet, and face are most commonly affected. Complications may

### Mr Frostbite

My name is Nigel Vardy and I've been writing about adventure and mountaineering for almost 20 years. I think we all need to spend more time doing things we enjoy, going to places that inspire us, laughing at ourselves, learning about the world around us and getting cold, tired, and scared every once in a while.

**Frostbite vs. Hypothermia Differences in Symptoms,**

### Signs ...

Frostbite and hypothermia are both caused cold exposure, and each can have long lasting effects, even death. In frostbite and hypothermia, the body tries to compensate for exposure to constant cold temperatures by maintaing constant temperatures to keep warm, which causes loss of heat production that is balanced by heat loss.
