Genetic algorithm - Wikipedia

In computer science and operations research, a genetic algorithm (GA) is a metaheuristic inspired by the process of natural selection that belongs to the larger class of evolutionary algorithms (EA).

What Is the Genetic Algorithm? - MATLAB & Simulink

The genetic algorithm is a method for solving both constrained and unconstrained optimization problems that is based on natural selection, the process that drives biological evolution. The genetic algorithm repeatedly modifies a population of individual solutions. At each step, the genetic algorithm selects individuals at random from the current population to be parents and uses them to Genetic Algorithms in Search, Optimization, and Machine ...

David Goldberg's Genetic Algorithms in Search, Optimization and Machine Learning is by far the bestselling introduction to genetic algorithms. Goldberg is one of the preeminent researchers in the field—he has published over 100 research articles on genetic algorithms and is a student of John Holland, the father of genetic algorithms—and his deep understanding of the material shines through.

An Introduction to Genetic Algorithms - Whitman College

An Introduction to Genetic Algorithms Jenna Carr May 16, 2014 Abstract Genetic algorithms are a type of optimization algorithm, meaning they are used to find the maximum or minimum of a function. In this paper we introduce, illustrate, and discuss genetic algorithms for beginning users. We show what components make up genetic algorithms and how to write them. Using MATLAB, we program several
