#### **How to Make a Copper Reflux Still: 11 Steps (with Pictures)**

In this instructable I will show you how to build a reflux still which can be used for producing high proof alcohol. This still is a basic reflux still, and is a nice intro into reflux stills, as more complex reflux stills are hard to build and will cost a lot.

#### **How To Make A Reflux Still Complete Plans To Build A ...**

The small copper tubes running through the column to the condenser is not enough surface area to cause a good reflux. Maybe if you put some copper mesh inside the column directly in contact with the 2 cooling tubes it would increase the surface area to get a better reflux action happening, it would be hard to get it in there and hard to keep it clean.

#### **Build a Whisky Still: 6 Steps (with Pictures)**

This is probably the easiest part to obtain, as coils of small-diameter copper tubing can be purchased from many DIY stores (sometimes called microbore, it is the 8-10mm tubing used to connect up modern central heating systems).

#### **Making copper the ancient way**

This summer we made several experiments reducing malachite (copper carbonate) to genuine copper with blowpipes in open fire pits. Now we know that it is possible to make metallic copper only using
