Using an automotive alternator to construct a wind-powered electrical generator can reduce or eliminate dependency on "grid" power, even if the wind turbine is only used for lighting or recharging batteries.

[4 Easy Ways to Build a Wind Turbine \(with Pictures\) - wikiHow](#)

To build a wind turbine, you'll first need to assemble a spindle and spokes for the turbine. Then, mount magnet rotors on the turbine and weld the spindle flange to the tower. Once you've done that, mount the main assembly of the turbine on the tower and secure it into place. Finally, attach the electrical components of the turbine to the rest of the assembly and connect it to a battery so you

[How to Build Your Own Wind Generator System | Sciencing](#)

A wind generator system can be built at home, mostly using commonly available household items, for the generation of electricity. Wind generators work by using the power of the wind to turn blades; this circular motion is used to rotate a motor, which in turn causes it to generate electricity.
