[Basics of the Index.html Default Webpage - lifewire.com](#)

The index.html page is the most common name used for the default page shown on a website if no other page is specified when a visitor requests the site. In other words, index.html is the name used for the homepage of the website. Websites are built inside of directories on a web server. Just like

[Google](#)

Search the world's information, including webpages, images, videos and more. Google has many special features to help you find exactly what you're looking for.

[Webserver directory index - Wikipedia](#)

A common filename for such a page is index.html, but most modern HTTP servers offer a configurable list of filenames that the server can use as an index. If a server is configured to support server-side scripting, the list will usually include entries allowing dynamic content to be used as the index page.
