Radial Basis Function Networks: Introduction

The radial basis function approach introduces a set of N basis functions, one for each data point, which take the form $f(x \cdot x_p)$ where $f(\cdot)$ is some non-linear function whose form will be discussed shortly.

What is a radial basis function? - Quora

A radial basis function (RBF) is a term that describes any real-valued function whose output depends exclusively on the distance of its input from some origin. In Wikipedia's notation, this can be mathematically expressed as:

Typically, radial bas
