decline as a result of illness, and rehabilitation is an essential part of medical care for this population. The Rehabilitation for older people - PubMed Central (PMC)

The erosion of rehabilitation for older people in our acute hospitals might be understandable if it was part of a strategy to develop rehabilitation at home. But this has not been the case, and widespread concern exists that rehabilitation based in the community continues to be underdeveloped and underfunded.

[Principles of rehabilitation of older people - ScienceDirect](#)

Rehabilitation is a hugely important intervention for older people because of the high incidence and prevalence of disability in old age. Factors contributing to the high burden of disability in this sector of the population include the increased prevalence of chronic disabling disease (overt and covert), the potential rapid deterioration in [Principles of rehabilitation of older people - Medicine](#).
