The Encyclopedia of Hepatitis And Other Liver Diseases ...

Acute hepatitis (liver inflammation) can cause a marked elevation in aminotransferase levels. Other liver diseases responsible for an elevation include autoimmune hepatitis, alcoholic liver disease, fatty liver , drug and herbal toxicity, liver tumors, genetic liver diseases, and heart failure. AST and ALT tests are usually given together. When the readings for both tests are compared, they may provide important clues to the nature of the liver disease. For example, within a certain range of
