The Nietzschean Self argues that Nietzsche's account

enjoys a number of advantages over the currently dominant models of moral psychology especially those indebted to the work of Aristotle, Hume, and Kant and considers the ways in which Nietzsche's arguments can reconfigure and improve upon debates in the contemporary literature on moral psychology and philosophy of action.

**Katsafanas, Paul. The Nietzschean Self: Moral Psychology ...**

Here Nietzschean Moral Psychology is argued to be preferable in various respects, both empirically and philosophically, although the most significant point is the enlarged role that Katsafanas argues Nietzsche gives to unconscious processes in motivation (279).
