Problem Set - physicsclassroom.com

Problem 11: A tall cup is partially filled with water ( $n=1.33$ ) to a height of 7.80 cm ( $H$  water). The diameter ( $D$ ) of the cup is 14.64 cm. A student looks downward just over the left rim of the cup at an angle of 40.47 degrees with the water's surface ( $\theta$ ).

SOLVED: Epson projector home cinema 2030 fixed the auto ...

The slanted line suggest interference of some sort with the video signal. The projector has a number of protection circuits built in. Usually there are temperature indicators as well. I am not familiar with your specific model to know whether or not there is a temp light. If not, the LAMP light may be indicating a temperature problem. If the ballast was the problem, the lamp would not light
