"Close your eyes for a minute and daydream about a world without bubble tests," writes Anya Kamenetz, author of [The Test: Why Our Schools Are Obsessed With Standardized Testing, But You Don't Have To Be](#). What is your opinion on standardized testing? | Yahoo Answers

Schools also have a way of manipulating the scores- for example, you have a sample of five students, student A scores 98 on the test, student B 90, student C scores 75, student D 60, and student E 48. Say the next year student D and student E drop out of school, and the others do worse on the test. The average grade of the test is higher because there's less scores, not because there's any

Last week the Chinese Ministry of Education launched another major reform effort to reduce the importance of testing in education. In a document sent to all provincial education authorities on June 19th, the Ministry of Education unveiled guidelines and a new framework for evaluating schools.

Why Do Standardized Testing Programs Report Scaled Scores?

Test questions from standardized tests are usually secure, but when the same test is repeatedly administered to a large number of test takers, the questions can become exposed to the public and jeopardize the testing process. Test takers can remember the test questions and share them with future test takers through different media. To address this concern, test takers taking a test at
