[Living with Type 2 Diabetes | Diabetes Canada](#)

Type 2 diabetes is a disease in which your pancreas does not produce enough insulin, or your body does not properly use the insulin it makes. As a result, glucose (sugar) builds up in your blood instead of being used for energy. Your body gets glucose from foods like bread, potatoes, rice, pasta, milk and fruit.

[Eye Damage \(Diabetic Retinopathy\) | Diabetes Canada](#)

Diabetic retinopathy develops over time and often goes unnoticed until vision loss occurs. All people with diabetes (both type 1 and type 2) are at risk for diabetic retinopathy. Regular eye exams are very important to detect changes early, even before you see any difference in your vision.

[What's the Difference Between Type 1 and Type 2 Diabetes?](#)

Type 1 and type 2 diabetes may have similar names, but they are different diseases with unique causes. Causes of type 1 diabetes. The body's immune system is responsible for fighting off foreign

[Type 2 Diabetes: Symptoms, Causes, Diagnosis, and Prevention](#)

Diabetes is a life-long disease that affects the way your body handles glucose, a kind of sugar, in your blood. Most people with the condition have type 2.

Type 2 diabetes can be reversed, say Canadian researchers ...

Type 2 diabetes is diagnosed when an individual's body is no longer able to properly use insulin -- the hormone that allows cells to absorb glucose in the blood. As a result, blood sugars build up.

[Risk of Retinopathy in Type 1 and Type 2 Diabetic Patients](#)

DR prevalence of DR higher in T1s; T2s have the major burden . One of the microvascular complications of type 1 and type 2 diabetes is diabetic retinopathy (DR), which can cause blindness and low vision in this patient population along with other age-related eyes condition.

[Type 2 Diabetes Diet Guidelines: Foods to Eat, Foods to Avoid](#)

Type 2 diabetes involves problems getting enough glucose into the cells. When the sugar can't get where it is supposed to be, it leads to elevated blood sugar levels in the bloodstream, which can lead to complications such as kidney, nerve, and eye damage, and cardiovascular disease.

[Types of Diabetes | Diabetes Canada](#)

What is type 2 diabetes? Type 2 diabetes occurs when the body can't properly use the insulin that is released (called

[streung_Digital Online Culture Identity And Schooling In The Twenty-first Century](#)

insulin insensitivity) or does not make enough insulin. As a result, sugar builds up in the blood instead of being used as energy. About 90 per cent of people with diabetes have type 2 diabetes. Type 2 diabetes more often develops in adults, but children can be affected.

10 Best Snacks for Type 2 Diabetes | Everyday Health
When you have type 2 diabetes, a smart strategy for controlling your blood sugar levels is to think of snacks as miniature versions of meals and plan your carbs accordingly.

Diabetes mellitus type 2 - Wikipedia

Type 2 diabetes makes up about 90% of cases of diabetes, with the other 10% due primarily to diabetes mellitus type 1 and gestational diabetes. In diabetes mellitus type 1 there is a lower total level of insulin to control blood glucose, due to an autoimmune induced loss of insulin-producing beta cells in the pancreas.
